

Bicycle Safety

The Mountain-Bay Trail is surfaced with very fine limestone or similar materials and is not designed for high speed travel. Bicyclists should be alert during inclement weather, as the trail surface can become soft and wet and erode quickly during heavy rains. The trail also can be subject to animal damage. Use caution around the sides of the trail as extremely STEEP slopes are present.

Here are a few general bicycle safety guidelines provided by the Wisconsin Department of Natural Resources:

- Wear bright clothing by day, white or reflective clothing by night. Shoes, pant leg clips, and **protective helmets are recommended.**

- Use a light and reflectors at night.
- Keep your bike under full control at all times.
- Keep your bike, especially the brakes, in safe condition.
- Slow down and use voice or bell to warn others as you pass.
- Be considerate of bikers coming your way, especially on hills. Keep right and allow room for oncoming traffic to pass.
- Keep at least two bike lengths between riders.

Please keep your trails clean and carry out your garbage and recyclables!
